

WEA RIVERSIDE

William Beville, Evergreen E A

I've taught in my local Elementary for over 20 years. This experience has given me great insight into the needs of students. We have many challenges facing us in the next few years. I'm proud to have represented you for the last 2 years.

Marla Morton, Evergreen E A

I am a Speech /Language Pathologist in the Evergreen School District who is a strong supporter of public education and special education for students with individualized needs. My current union involvement has been on the Executive Board as the minority representative for my local union and a building representative at the middle school level. For the past two years I have served on the WEA Executive Board which has provided me with leadership opportunities to encourage member engagement and communicate with staff about educational policies that affect our professions and address student needs. Within my district, I am currently on a Teaching Equity Committee and I participate in Culturally Responsive classroom management and strategy trainings for educators in the SW Washington region. This demonstrates my dedication toward providing meaningful professional development for my colleagues. With this experience I would like to continue my role to represent our members by supporting many issues at the state and national levels to maintain a strong union for our membership. I feel that my experience, knowledge and skills have contributed to my growth and I look forward to having the opportunity to be your advocate and a voice of support.

Megan Miles, Hockinson E A
