

District Supplied Cleaners and Disinfectants

Many members have written to the LWEA staff with questions regarding authorized district disinfectants, use of disinfecting supplies from home, and the safety and effectiveness of certain cleaners. The three products below are authorized cleaning and disinfecting products provided by the district for in school use.

1. The A-456 II Disinfectant (purple) product is for custodial staff use only. This is a spray on, wipe off product meant for surfaces and “high touch point” items such as door handles and hand railing.
2. The QC-91 Neutral Bathroom Cleaner is again for custodial staff use in bathrooms only.
3. The H2Orange2 Light Duty Cleaner is for general staff use and is meant to spray on/air dry.
